(48) 99812-0780 | dboravieira97@gmail.com | <https://www.linkedin.com/in/deborav/>

Data Engineer experienced in building and maintaining ETL/ELT pipelines, covering the full data lifecycle from ingestion and transformation to data validation and delivery. Proficient in Python, SQL, PySpark, Pentaho, AWS Glue, Athena, S3, and data modeling, with a focus on automation, data quality, and solution reliability.

PROFESSIONAL EXPERIENCE

Safe Consig | 06/2026 - Present

ETL Developer

I develop and maintain ETL/ELT pipelines for multiple clients, covering the entire data lifecycle from collection and transformation to validation and loading. I also implement data quality checks to identify inconsistencies, invalid values, and missing information, documenting and communicating issues to clients to prevent unreliable data from reaching downstream reports and business processes.

Skills: Python, SQL, Pentaho, ETL/ELT, Data Pipelines, Workflow Orchestration, Excel, Power BI, and Scrum.

Zallpy Digital - BMW Canada | 04/2025 - 05/2026

Data Analyst / Analytics Engineer

Led the migration of over 30 dashboards from Tableau to Amazon QuickSight, mapping and centralizing multiple data sources in AWS. Developed data pipelines and analytical tables using AWS Glue, PySpark, Athena, and S3, rebuilt SQL queries, and cataloged data sources with AWS Glue Crawlers. Throughout the project, I investigated inconsistencies, identified their root causes, and aligned business rules with international stakeholders, resulting in a more reliable, scalable, and maintainable analytics environment.

Skills: Python, SQL, NoSQL, PySpark, AWS (Glue, Athena, and S3), ETL/ELT, Data Pipelines, Tableau, Amazon QuickSight, and Scrum.

Doutor-IE | 12/2023 - 04/2025

Data Analyst

Led the development of automated data integration, transformation, validation, and monitoring workflows using Python, SQL, MongoDB, and APIs. These solutions enabled proactive inconsistency detection, accelerated issue resolution, and improved the reliability of data used across multiple business areas. I also built pipelines to feed dashboards and analytical reports and developed generative AI integrations, including chatbots that achieved over 95% positive user ratings and reduced the support team's manual workload.

Skills: Python, SQL, NoSQL, ETL/ELT, Data Pipelines, APIs, Git, AWS, Generative AI, Power BI, Looker Studio/Data Studio, and Kanban.

EDUCATION

- B.B.A. in Business Administration, Estácio University, Expected Graduation: 2027
- B.A. in History, Santa Catarina State University (UDESC), 2020

LANGUAGES

- Portuguese - Native.
- English - Professional working proficiency.
- Spanish - Basic proficiency.
